All,

A few months ago, we met with you and EPA Region 10 Office of Water and Watersheds staff to discuss coordination of the NPDES permit renewal process with the ongoing CERCLA work and anticipated focused RI/FS for groundwater associated with the Soda Springs CERCLA site. We want to ensure both processes remain aligned and facilitate continued agency coordination. To that end, we are providing copies of the NPDES permit renewal application forms that we recently submitted to the EPA Region 10 Office of Water and Watersheds.

We look forward to working together to coordinate the CERCLA work, the NPDES permit renewal, and, related to both, amendment of the Bear River/Malad River Subbasin TMDL and will be reaching out in the coming days and weeks to discuss next steps.

In the interim, please let me know if you have any questions.

Jason Maughan
Sr. Environmental Regulatory Specialist
Monsanto - Soda Springs, ID
Office: 208-547-1239
